

COMPLAINS

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

You were my precious thing
What will I do without you?
Although I'd foreseen it
You should never had been caught
And as long as this madness lasts
Even if, I swear, I'll fight
My heart complains

My heart complains
(complains)
I just can't help it
(complains, my heart complains)
Scars will always remain
(complains, my heart complains)
We should have never been split
Like a constant humming,
my heart keeps on Complaining

You were my precious thing
What will I do without you?
Why could they not understand?
(It was not a mindless act, it was not a mindless act)
For our child to come
We wanted the best
Leaving Africa was the only way
But they just care for themselves, don't they?

My heart complains
(complains)
I just can't help it
(complains, my heart complains)
Scars will always remain
(complains, my heart complains)
We should have never been split
Like a constant humming,
my heart keeps on Complaining

I long to hold you near
And kiss you just once more
I remember the day
Standing at the dock of Lagos

Oh my Lord, oh my lord, I pray

HIDDEN LOVE

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

Twice a week, when came night-time
Far out crowd we use to meet
But there in the thin light
No use to cheat, we were so sublime

Far out from our lives
We use to dive
In the midst of our souls
We were so alive

You know you let my heart bleed
You know you've done a terrible mistake
But you got a fire
The only thing I'd never stand to lose

For all my life, I'll remember
How you broke that magic spell
It was there in the bright light
Facing your live, decide to break it out

Far out from our lives
We use to dive
In the midst of our souls
We were so alive

You know you let my heart bleed
You know you've done a terrible mistake
But you got a fire
The only thing I'd never stand to lose

Never, never, never, never, never stand to lose

Far out from our lives
We use to dive
In the midst of our souls
We were so alive

LET'S FALL IN LOVE

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

Lost in the unemployment lines
Wasting your days reading fool things
Now winter is turning to spring
And you have done next to nothing
Even if you have found a job
Will it really enhance your life?
Last night you saw that beauty dancing
Sure she will give you a chance

Let's take it slow
No need to hurry
Wherever you go
Let's take it slow

Let's fall in love
Be in harmony
That's the only things
That made you truly feel alive

Living jobless is not so easy
But in a way it gives you time
To taste in every paths
The beauties of life
So don't keep boxed
Drop out everyday's concerns
Last night you saw that beauty dancing
Sure she will give you a chance

Let's fall in love
There's no place in this world for romantics
Take your life slow
Don't be so fast and calculated
Let's fall in love
Try to be in harmony
That's the only things
That made you truly feel alive

MAGIC GIMMICK

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

It's nice to stay still
Just lay down there
Wasting time
Looking for nothing more

Let him link our souls
To the chords he plays
A mighty Stream that leads us
To the border line of consciousness

But my love
In this sickly world
Where happiness is in sale
It's nice to have a place to hide

Let's coil up in music
Just shield our minds with it
Let's mix up in the stream
Escape them and weave our dreams
To the border line of consciousness

Why should we go by the clock everyday?
Just let your heart lead the way
Melt your soul with the beat
On that magic, on that magic gimmick

Now let our hearts
Beat as one, beat as one, beat as one

Now let our spirits
Linked by that, link by that, link by that

Now let our hearts
Beat as one, beat as one, beat as one

Now let our spirits
Linked by that, link by that, link by that

MODERN SLAVERY

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

Morning rises, back in the street
Feeling lonely in the crowd
With the will, and good fortune
I'll still be on my feet at night

Fear is my only companion
Lurking in my guts and soul
Surviving is the primary goal
Living on from day to day

Can't you see?
It's modern Slavery
That what they call a "Democracy"
Is just another word for Tyranny
And if you look carefully

It's just modern slavery
Modern slavery

In the midst of that society
That is Enslaved by economy
Blinded by the fear of "Others"
They don't even see the dangers

Surrounded by the fools
I try to bypass the rules
I try not to sink in the hole
Surviving is the primary goal
Living on from day to day

Can't you see?
It's modern Slavery
That what they call a "Democracy"
Is just another word for Tyranny
And if you look carefully

It's just modern slavery
Modern slavery

But I'm looking for a day
when men would dare to say
there would be no exploitation
looking for human-hood salvation

When economy would be
Not just the tool of the hypocrites
When surviving is the primary goal
living on from day to day

Can't you see?
It's modern Slavery
That what they call a "Democracy"
Is just another word for Tyranny
And if you look carefully

It's just modern slavery
Modern slavery

OLD TUNES

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

And that pretty sound's (good enough for us)

That kind of music
Which make me sick
Ni vibes, bad beat generation

It don't please me
I do appreciate all the good sounds
Remix for the dance floor
All around the world

Don't you remember the days of
Let's groove tonight
Don't you remember the days of
Good times

And that pretty sound's good enough for us

All of us are some kind
Of a family
Linked together dry the vibes
For the music

All together we do our best
Ta share with you
Remix all the old tunes
All around the world

Don't you remember the days of
she's fresh she's so fresh
don't you remember the days of
just give me the night

and that pretty sound's good enough for us

PUSH ME HIGHER

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

In this vast and corrupt world
We sometimes loose the way
But I'm shielded from those troubles
I feel this way
Egocentrics people made
A world that fit their minds
But I'm shielded from those troubles
And I feel this way because

I got the groove
I got the music, I got the music
I got my love
Who could ask for more?
I got the star lights
I got sweet dreams, I got sweet dreams
I got the good times
That push me higher

Anyway, let get it in
You will soon start to feel it
That sensation rising up trough you
and push you higher
Your concerns lighter
Push me higher

Whatever life's passing through us
But some stole it to match their goal
I feel shielded from your ambition
I feel this way
You could see me as a mindless fool
You'd be struck dumb it I told you
I feel shielded from your mad vibes
And I feel this way because

I got the groove
I got the music, I got the music
I got my love
Who could ask for more?
I got the star lights
I got sweet dreams, I got sweet dreams
I got the good times
That push me higher

Anyway, let get it in
You will soon start to feel it
That sensation rising up trough you
A taste of fullness
That push you higher
Your concerns lighter
Push me higher

Whatever the wind blows
People have to go ahead
But I'm shielded from those troubles
I feel this way
Friends of mine have wives and child
When I'm still living as a wild
But I'm shielded from those troubles
I feel this way because

I got the groove
I got the music, I got the music
I got my love
Who could ask for more?
I got the star lights
I got sweet dreams, I got sweet dreams
I got the good times
That push me higher

Anyway, let get it in
You will soon start to feel it
That sensation rising up trough you
A taste of fullness
That push you higher
Your concerns lighter
Push me higher

TIMES

Vincent Nicolas, Pascal Miton, Sébastien Gocsei, Pierre Storch, Vincent Santamaria, Carine Laurent, Alexandre Magarelli

A bird is whistling
kids are laughing
Oh, you treaded me badly
But I love you madly
There in the spring wind
I keep on breathing
Days escaping

Time is going on
Time has tainted our love
Time is almost freezing
Time is standing still
Time, time, time...

A cat is hunting
People are passing
Oh, my heart is aching
But I keep on loving you
There in the spring wind
I keep on breathing

Why couldn't I just get rid of those tears?
As if life were a movie
I'm watching life running away from me

Time is going on
Time has tainted our love
Time is almost freezing
Time is standing still
Time, time, time...
